We can supply publications from the Institution of Engineering and Technology (IET), including material relating to the IEE Wiring Regulations (BS 7671:2001). To view a selection of publications, please [click here](#) for more information. The Institution of Engineering and Technology was formed by the Institution of Electrical Engineers (IEE) and the Institution of Incorporated Engineers (IIE) and now has more than 150,000 members worldwide. It is the largest professional engineering society in Europe and the second largest of its type in the world. The Institution provides a range of publications and information services in many areas of engineering and technology. It plays a key role in the electrical installation industry in terms of standards and safety, and is known for its independent and trusted voice in this sector.

The Institution of Engineering and Technology manages the national committee JPEL/64 which prepares and updates the regulations for the safety of electrical installations in buildings, and publishes the standard BS 7671:2001 (the IEE Wiring Regulations). It also provides and publishes extensive guidance upon the standard as well as related codes of practice.
